SUMMARY

I am a dedicated Cyber Security Analyst currently working with Wipro Technologies. With a solid background in Computer Science, I possess intermediate skills in programming languages like C, Java, Python, and SQL, along with training in full-stack development and Google Cloud. My passion lies in enhancing my technical abilities while contributing to impactful projects and securing vital technical infrastructures

EXPERIENCE

Cyber Security Analyst (SOC)

Wipro Technologies

03/2023 – 12/2025 Hyderabad

Kellogg's, a multinational food corporation, employs SOC analysts to monitor and respond to security threats

- Continuously monitor network traffic, systems, and applications for suspicious activity
- Analyze alerts and logs to identify the nature and severity of security incidents.
- Configure Conditional Access Policies and MFA for global user groups (employees, vendors).
- Conduct Privileged Access Reviews, risk assessments, and define remediation plans.
- Troubleshoot API failures, review response codes, handle exceptions, and validate success/failure logs.
- Manage users, groups, roles, service principals in Entra ID (Azure AD).
- Respond to confirmed security incidents, taking actions to contain threats and restore systems.
- Manage and administer Delinea Secret Server including folders, policies, secrets, privileged accounts, and user permissions.
- Help identify and address vulnerabilities in systems and applications

EDUCATION

BTech in Computer Science And Engineering

SASI Institute of Technology and Engineering

08/2018 - 05/2022 Andhra Pradesh

Intermediate (MPC)

Narayana Junior College

06/2016 - 03/2018 Andhra Pradesh

SSC

Adarsha Vidyanikethan High School

06/2014 - 03/2016 Andhra Pradesh

LANGUAGES

Telugu
Native

English
Proficient

KEY ACHIEVEMENTS

Security Incident Reduction

Achieved 30% reduction in security incidents in 6 months through improved threat monitoring.

Unauthorized Access Prevention

Successfully implemented security measures, resulting in 95% decrease in unauthorized access.

Vulnerability Management Leadership

Led a team improving system vulnerability management, reducing risks by 25% within a quarter.

Incident Response Automation

Developed automated scripts increasing incident response efficiency by 40% in the SOC team.

SKILLS

GCP **IAM** **Java** **Python** **SQL** **Gmail**

PROJECTS

Automated Timetable Scheduling Using Genetic Algorithm

01/2023 - 02/2023

Automated Timetable Scheduling Using Genetic Algorithm

- Used genetic algorithm for scheduling tasks
- Collaborated in a team of 4 for effective project execution

Home Automation Using IoT

01/2023 - 02/2023

Home Automation Using IoT

- Developed IoT applications for home automation
- Collaborated in a team of 4 to complete the project.

PROJECTS

Skin Lesion Segmentation And Classification On Dermoscopic Images

07/2022 - 12/2022

Skin Lesion Segmentation And Classification On Dermoscopic Images Using U-NET Algorithm

- Implemented skin lesion segmentation and classification using U-NET
- Worked in a team of 4 for project development
